

Product	Image	Peace of Mind Benefits
Trane CleanEffects™		<p>TRANE CleanEffects™ air filtration system can provide your family with the cleanest air in the industry. A blessing for asthma and allergy sufferers, it can remove up to 99.98% percent of airborne allergens from your home's air as it is heated or cooled.</p>
Trane Comfort Controls		<p>Maximize the performance of Trane's heating and air conditioning systems with reliable, accurate temperature control. With an attractive, streamlined design, our thermostats will fit beautifully into any home's décor.</p>
Humidifiers		<p>When it comes to the comfort of your indoor air, it isn't always just a matter of proper air temperature. For many families, a whole house humidifier not only provides the right amount of moisture, it can also help to keep irritating airborne particles from circulating as easily.</p>
Extended Warranties		<p>Peace of mind protection, no unplanned repair bills, the manufacturer pays the bills. Must have the records of maintenance as outlined in the owner's manual.</p>
Energy Recovery Ventilators		<p>When a home is well sealed it is very energy efficient, but a new problem arises – it becomes like a plastic bag. What is inside stays inside, including pollutants that we DON'T want. To solve this problem, the home needs to be ventilated. This is where an ERV comes into effect.</p>
CO Detectors		<p>A CO detector or Carbon Monoxide detector will sound a siren to alert you and your family that dangerous levels of carbon monoxide are building up.</p>
Duct Smoke Detector		<p>In a fire, it is smoke that kills long before the flames reach the occupants. Commercial law makes it mandatory to install a duct smoke detector on systems to prevent smoke circulation throughout a building. Now, you can have the same protection in your home where you sleep.</p>

<p>Registers & Grilles</p>		<p>High quality registers and grilles are engineered to deliver the maximum air flow into the room and are designed to mix the air properly within the room, creating increased comfort by eliminating hot or cold spots and greatly reducing the air noise level.</p>
<p>Zoning Systems</p>		<p>An Integrated Zoning System represents the highest technological achievement in heating and air conditioning. It will run so quietly and provide such even and continuous comfort that you'll wonder how you lived without it for so long.</p>
<p>Maintenance Agreements</p>		<p>According to industry experts, heating and cooling equipment benefit from maintenance. Without maintenance, equipment can lose 5% of its original efficiency per year. With maintenance, you can retain 95% of the original efficiency, and allows you to keep equipment warranties in good standing with the manufacturer.</p>
<p>Ultra Violet Air Treatment</p>		<p>Helps make your home healthy. Kills mold, bacteria, and viruses, reduces the spread of colds and flu in your home, and relieve symptoms from allergies and asthma.</p>
<p>Freeze Alarms</p>		<p>If you leave your home for extended periods during the winter, consider installing a Freeze Alarm. If the temperature in the home drops below a set level, this product will call from 1 to 3 phone numbers to issue a low temperature alert. Three models available with various features including basement water and intruder alert motion sensors.</p>
<p>Generators</p>		<p>Why miss out on Thanksgiving dinner or be cold and uncomfortable if you have a power outage. Our home generators provide the necessary electricity to keep your lights and heat on. Protect your home and health when the wind, ice, or utility failures occur.</p>
<p>AC Covers</p>		<p>Put money in your pocket while protecting your AC unit from ice and snow or fall leaves. A clean unit efficiently transfers the heat to outdoor air, while dirt coats the coils and makes the unit less efficient. An efficient unit equates to energy saved.</p>
<p>Media Air Cleaners</p>		<p>Provides quality airflow, free from most dust, pollens and some bacteria, up to 90% of air borne products are removed. Media air cleaners have great over-all performance and provide the help with allergies and asthma at an economical price.</p>
